

PLASMA DISPLAY APPARATUS

5

ABSTRACT OF THE DISCLOSURE

A structure, in which the frame can be successfully fixed to the plasma display apparatus at a low cost, has
10 been disclosed. The plasma display apparatus comprises a plasma display panel, circuit substrates having drive circuits to drive the plasma display panel, a main frame to mount the circuit substrates, and adhesive tapes to fix the plasma display panel to the main frame, and small
15 holes are provided on the portion to which the adhesive tapes of the main frame are fixed so that they are arranged regularly at established intervals. When the adhesive tapes and the main frame are fixed, no air bubbles form between the adhesive tapes and the main
20 frame because plural small holes are provided on the portion to which the adhesive tapes of the main frames are fixed.
